## InSite Real Estate

InSite specializes in the execution of multi-unit retail build-to-suit development programs for corporate and franchisee tenants nationwide. Since 1988, InSite has completed over 500 build-to-suit projects in over 35 states for over 50 companies.

### Retail Build-to-Suit Program

The program achieves the InSite Project Standard – the **optimal market location; a high-performance, low-cost facility; a market-responsive, transparent transaction; and certain, hassle-free execution** – on each client single-tenant and anchored multi-tenant project; and, simultaneously delivers multiple projects to meet the client's business plan.

### Property Search – “He who turns over the most rocks wins!”

A key part of the Build-to-Suit Program, InSite's Property Search Team—working pro bono either directly with the client or its broker – gives clients the winning edge in beating rivals to the best location in a target market. Using technology to systematically aggregate all on-market property and aggressive “boots-on-ground” to scour the market for off-market property, the team identifies and comparatively evaluates all property alternatives that meets a client's location standards and issues a client-specific report – a MarketBRIEF – detailing the results.

InSite completes over 100 market searches annually and prepares an overview – a MarketVIEW – of each. To see recent and future market searches and obtain a completed MarketVIEW, or to request a market search for your firm, contact a member of InSite's Retail Team below.

### Let Us Prepare a Program Proposal

To determine if InSite's Multi-unit Build-to-Suit Program is right for your company, let InSite prepare a Program Proposal for your review. The proposal will describe the program in detail and will include a Prototype Project Model (plans, schedule, and budget template), Rent Calculation, and Lease Terms to be used for each tenant project.
